

SCHEDULE 10 • Revenue Fund Receipts

General Instructions

Schedule 10 is divided into three sections. The first section reports Total Revenue Fund Receipts and equals the sum of Revenue Fund Revenues and Transfers from Own Funds.

The second section, Continuity of Revenue Fund Balance, is a continuity section and presents accumulated net revenue (deficit) at the beginning and end of the year. This is the accumulated net surplus (deficit) of the municipality.

The third section, Continuity of Government Business Enterprise Equity, is a continuity section which presents the government business enterprise equity at the beginning and end of the year.

Schedule 10 is a summary schedule. It is completed after Schedules 20 to 28, 72 and 12, schedules that report taxes, taxes receivable and current revenue for specific functions. Data from those schedules automatically populates several lines in Schedule 10. Where data is carried forward, an SLC (schedule, line, column) reference appears after the caption for the line, indicating the source of the data.

The following items are automatically carried forward from other schedules:

- Taxation - Own purposes
- Payments-in-lieu of taxation
- Ontario conditional grants
- Canada conditional grants
- Revenue from other municipalities
- User fees and service charges
- Total revenue fund expenditures

For lower-tier and single-tier municipalities, Taxation - Own purposes is automatically calculated and consists of total taxes before adjustments in Schedule 26 less tax adjustments before allowances in Schedule 72 (SLC 26 9199 04 less SLC 72 2899 07).

Tax adjustments before allowances are also used in the equation and are carried forward from Schedule 72, Continuity of Taxes Receivable (SLC 72 2899 07).

For an upper-tier, Taxation - Own purpose is automatically calculated from data in Schedule 28, Upper-tier Entitlements, and represents total upper-tier entitlements less payments-in-lieu (SLC 28 0299 12 less SLC 28 0299 08).

Note that total upper-tier entitlements reported in column 12 (Total) are net of upper-tier tax adjustments.

In the sale of a service, the vendor is actively engaged in providing a service to another party. In a rental situation, the owner permits another party to use municipal assets, such as:

- 1) Engineering structures. Includes a broad range of physical structures owned by a municipality.

- 2) Buildings and land. Includes the rental of land, living accommodation, office, storage or other building space.
- 3) Machinery and equipment.

Concessions and franchises are privileges or rights granted in respect of municipal functions, activities or responsibilities. Concessions and franchises are similar and may be hard to distinguish from one another. Franchises tend to be essential services of a general nature. Concessions tend to be service conveniences and the public generally has alternative choices.

A fairly common feature of franchise agreements especially, is the provision for payments over and above the agreed upon franchise fee. Any such payment which is clearly not a business tax or licence fee should be recorded here.

Examples: concessions and franchises from private fairs, circuses, cafeterias in municipal buildings, electric and natural gas utilities, etc.

CONTINUITY OF GOVERNMENT BUSINESS ENTERPRISE EQUITY

According to the Canadian Institute of Chartered Accountants, Public Sector Accounting Recommendations, PS 1300.21, a government business enterprise has the following characteristics:

- (a) It is a separate legal entity with the power to contract in its own name and that can sue and be sued;
- (b) It has been delegated the financial and operational authority to carry on a business;
- (c) It sells goods and services to individuals and organizations outside of the government reporting entity as its principal activity; and
- (d) It can, in the normal course of its operations, maintain its operations and meet its liabilities from revenues received from sources outside of the government reporting entity.

Municipalities report business government entities on a modified equity basis. This avoids line by line consolidation of the enterprise's operations with the municipality and its local boards. At the same time, reporting on a modified equity basis provides summary information on net assets and net income.
